

Jake DiBattista

Fullstack Engineer · React / TypeScript · Real-time & Video Product UIs

St. Petersburg, FL · Open to Remote (USA) jake.a.dibattista@gmail.com linkedin.com/in/jakedibattista
github.com/jakedibattista buddysports.app

Fullstack engineer and product founder who ships production React/TypeScript web apps with live media, realtime clients, and clean APIs. Recent work centers on interactive video capture UIs, WebRTC voice sessions, signed-URL video uploads, and performant client-server flows on containerized cloud backends —built end-to-end as Founder & Lead Engineer of Buddy Sports Tech.

CORE SKILLS

Frontend React, TypeScript, Next.js (App Router), React Native / Expo, Tailwind CSS, responsive UI

Realtime / Video WebRTC sessions, MediaRecorder webcam capture, Firestore listeners, video upload pipelines

APIs & Backend Node.js route handlers, Python/FastAPI services, REST design, Firebase Auth/Storage

Cloud & Ops GCP (Cloud Run, Firebase), Docker, Vercel; AWS Certified Cloud Practitioner & AI Practitioner

Product delivery Cross-functional ownership from UX research → architecture → ship → production hardening

EXPERIENCE

Founder & Lead Engineer · Buddy Sports Tech

Sep 2025 – Present

Architected and shipped Puck Buddy (iOS/Android), Buddy Live (web), coaches dashboard, and marketing site

- Built **Buddy Live** in React/TypeScript (Next.js): live coaching UI with webcam capture (MediaRecorder), ElevenLabs **WebRTC** voice, Firestore realtime session state, auto-reconnect (up to 5 attempts), and scorecard dashboards.
- Designed client-server video APIs: browser mints short-lived **signed PUT URLs** and uploads clips directly to cloud storage, bypassing serverless body limits that previously caused 413 failures on multi-MB video.
- Shipped containerized Python services on **Google Cloud Run (Docker)** with SSE streaming to the web client; hardened production reliability (reconnect context, instance pinning for in-memory session continuity, Sentry/Cloud Trace).
- Led frontend for the **Puck Buddy** React Native (Expo) app and **Next.js coaches dashboard** (TypeScript, Firebase Auth session cookies, charts/stats)—same Firestore backend across mobile + web.
- Optimized video UX under device constraints: Android client-side compression to ~720p H.264 (~20 MB from multi-hundred-MB 4K clips) before upload, preserving motion detail for analysis.
- Grew Puck Buddy to **1,000+ downloads** with a sustained baseline of ~20 daily active users (Jan 2026), owning product, engineering, and release cycles.

Design Researcher · Sam's Club (Walmart)

Feb 2022 – Jun 2025

- Partnered with product and engineering on in-club and online experiences; facilitated design-thinking workshops that shaped product roadmaps.
- Engineered the latest iteration of Sam's Club's **generative AI customer support** experience, rolled out to 1% of members.
- Designed an in-club tablet experience for navigation/product discovery; identified Scan & Go churn indicators used by the business in FY2024.

CEO & Front-End Lead · Youni

Nov 2021 – Jan 2023

- Led a team of 9 (engineering, design, marketing) building a React (Remix) web app integrating ChatGPT and blockchain APIs; deployed at 5 universities.
- Owned front-end design/engineering and company operations; Department of Labor XPU showcase finalist (presented in Washington, DC).

Earlier roles · UX Research & Product (Softrams, SuperDVille, drchrono, SimpleVisit) 2016 – 2022

- Led UX research and product specialist work across healthcare SaaS and education products— stakeholder discovery, accessible design, demos, and launch support that still shapes how I build operator-facing UIs.

SELECTED PROJECTS

- **Buddy Live** — Real-time voice + video coaching web app (React/TS, WebRTC, Cloud Run). Demo: buddy-live-indol.vercel.app/coach · github.com/jakedibattista/buddy-live
- **Puck Buddy** — AI hockey video analysis on iOS/Android (React Native/Expo, TypeScript, Firebase, Cloud Run).
- **Scout** — Next.js lacrosse scouting MVP with signed-URL video upload to GCS and Gemini analysis agents.

EDUCATION

B.S., Computer Science — University of Maryland, Baltimore County (UMBC) 2011 – 2015

M.A., Design Leadership — Maryland Institute College of Art (MICA), with Johns Hopkins Carey Business School 2020 – 2022

AWARDS & CERTIFICATIONS

Grand Prize — Google Cloud × MLB Hackathon (Pitcher Mechanics Scorecard); demoed live at Google Cloud Next 2025 Developer Keynote

AWS Certified Cloud Practitioner (Dec 2024) · AWS Certified AI Practitioner (Feb 2025)
